All products & accessories from the
pioneer in dermopigmentation

Created by Dr. Tiziano in 1999, BIOTIC Phoea offers recognised expertise in medical and aesthetic dermopigmentation.

BIOTIC Phoea is specialized in design and manufacture of sterile pigments, meeting the European standards for Medical Devices CEIIB.

BIOTIC Phoea naturally expanded its range to the field of aesthetic Permanent Makeup with its Airless Color® range, and its multi-use bottle preserving sterility even after opening.

Today, BIOTIC Phoea has established itself as THE reference on the European market pigments for dermopigmentation.

You will find in this catalogue all the products required for successful, natural and long-lasting aesthetic dermopigmentation.

DERMO C+

«I was very pleasantly surprised by the ease with which it can be inserted into the epidermis from the very first pass, with a visible rise in colour immediately, and the colour on my client is just sublime. I was blown away by the result»

Muriel T.

AIRLESS COLOR®

Sterile pigment for multiple uses

Manufactured in a controlled atmosphere in an EN13485 and GMP certified laboratory, **Airless Color® pigments** are the result of a precise blend of organic and mineral pigments, which are subject to rigorous controls : analysis of heavy metals and aromatic amines.

They are in perfect compliance with European and French legislation, one of the most rigorous in the world.

Easy to use thanks to an ultra-precise pump, the Airless Color® pigment remains sterile between each use.

Without preservatives, water or petrochemicals, the pigments are adapted to the skin pH and guarantee optimal results in complete safety for your customers.

Choosing Airless Color® means making the quality and safety choice

THE COLORS

(see p. 8 to 11)

Airless Color® is **available in over 80 colours** to ensure you get the result you want :

- Assertive eyebrows (from the lightest to the most intense tones)
- Natural, contoured, shaded or enhanced lips
- Eyeliner, kohl, lash-liner (ciliary densification)
- Restorative dermopigmentation: areolas, scars, vitiligo, stretch marks
- Trichopigmentation
- Wide range of correctors and anti-oxidants

Discover also our Microblading range !

A thicker formula for a better hold, and always a natural result !

BOOSTER Pigment

Ref: D011-BOOSTER

The BOOSTER is added to the pigment (2 drops of Booster for 8 drops of pigment). It allows a better setting in the skin for a bright colour, which reduces or even avoids touch-up !

10 ml • 35,00 € VAT FREE

Diluent

Ref: D002-DI

Designed to light end a color without altering its shade. It can be mixed with all Biotic Phoceia colours.

13 ml • 25,00 € VAT FREE

Dermo C+ Sublim'Ink®

Ref: D340-321

With its hyaluronic acid content, the skin is intensely nourished and hydrated. This cosmeceutical ingredient, an hydration booster, is known for its plumping effect. DERMO C+ facilitates dermopigmentation and softens the pen's passage for soothed skin.

THE *Signature*[®] DERMOGRAPH

By BIOTIC Phoea

EXCELLENCE AT THE SERVICE OF YOUR EXPERTISE

USE

The *Signature*[®] dermograph has been designed for dermopigmentation professionals, through their experience to ensure excellence and reliability. Its acupuncture needles have revolutionized the dermopigmentation industry by providing **unique performance** for the professional and **unparalleled comfort** for the pigmented person. A true technological jewel, the allows for non-traumatic pigmentation for the skin, thanks to its **flexible** acupuncture needles, all of which are highly precise. This innovation makes dermopigmentation not only extremely **effective**, but also **safe and comfortable**. Suitable for all and all techniques, the motor can also be used with «traditional» and ultra-performing needles, thus making it possible to respond to all situations. Its **unique materials** will ensure the user a great reliability, an extraordinary **lightness** and a stable needles output for a **regular work**.

Design: modern and elegant.

- The central unit
- The handpiece and its support
- The pedal
- International plug adapters

Weight of the handpiece : 78 gr

Weight of the unit : 870 gr

Dimensions : 15x 15x 3cm

THE BEST THING ABOUT IT:

- Innovative and **precise needles** for a hair by hair **as fine as microblading**
- **Less painful** for the pigmented person and less traumatic for the skin
- **+50%** pigment implanted
- **Ergonomics/ design** of the tattoo machine and its accessories
- **Reliability** of the motor
- **Faster service**

IN DETAILS

Innovative **SECURE** needles:

- 10+ references available
- Available in two versions : **acupuncture** needles (Powder HR) and traditional needles
- **PROTECT** technology for increased safety (anti-reflux, safety cartridges)
- **Reduced pain** with HR needles
- **50% more pigment** in one pass
- All **adaptable** to the BIOCEA®+ dermograph

A revolutionary aluminium handpiece :

- With its ergonomics and technology, you will benefit from a higher **rate of regularity**, more efficient work, shorter healing time and faster pigment setting
- It is **silent**, does **not wobble** or **vibrate** and does not **overheat** even during prolonged application
- Automatic cartridge **retraction** for your safety
- Optimal weight for vibration **absorption**
- Reinforced system to ensure that the cable does not **deform** or **break**

A high-performance, reliable and ultra-precise engine :

- It offers a **large speed scale** (50 to 150) to be selected according to the area to be treated
- Equipped with a **sensitive** and **fast** touch screen, it will provide you with unparalleled ease of use
- White **LEDs** for displaying the speed
- Easy to **clean screen**

By Biotic Phocée

POWDER HR NEEDLES

Powder HR acupuncture needles with the *Signature*[®] dermograph guarantee the highest precision of movement. Thanks to the spherical shape of the top of the tip, the amount of pigment deposited in the skin is greater. The blood vessels are not damaged or impaired, so the skin is much less traumatized.

The HR flexible needle is extremely fine and gently injects the pigment into the skin without tearing it or causing excessive irritation.

Bleeding is reduced to a minimum and the skin retains much more pigment after one pass. This makes pigmentation more effective and virtually painless. The skin heals very quickly afterwards.. These needles will be indispensable for your powder techniques only.

Precautions for using Powder HR needles: hold the handpiece at 90° and pigment with a low speed.

(speed 50 for the *Signature*[®] dermograph and 60 for the BIOCEA[®]+ dermograph.)

TAILOR-MADE COSMETIC

Coming from the medical world, our scientific team is inspired by the latest trends to create innovative cosmetic formulas from specific raw materials. According to your specifications and marketing expectations, we can design cosmetic products with innovative textures and original fragrances. Trust our know-how in Research and Development to give a new dimension to your brand

TAILOR-MADE FORMULAS

You wish to sell your own cosmetic formulation, designed to suit your concept and match your wishes (texture, ingredients, fragrance)? A selection of beauty care products for the body, face and hair including other specific skincare products (cosmeceuticals, peeling...) available in the following forms: lotion, serum, gel, gelcream, butter, milk, oil, mask...

From designing stage (in accordance with your specifications) to the manufacturing stage, including packaging and labelling, we advise you on regulations, coordinate technical information files, deal with particular requests and marketing issues (packaging, brand image, promoting your product...)

TURNKEY SOLUTIONS

Choose your cosmetic products from our standard formulas, that have already been developed and tested. BIOTIC Phoceia will take care of the manufacture and packaging of your cosmetic products in packaging that reflects your image.

MOQ : 200 pieces per reference

We also offer you the benefit of our regulatory expertise in order to provide you with the perfect support for your cosmetic project.
